Discontinued Product Notification

Dear Customer,

Following analysis of the Bussmann and Redspot low voltage fuse ranges some duplication in our portfolio has been identified. As a result we have undergone a rationalisation process which will result in a number of products being discontinued and replaced with their equivalent. It is hoped that this change will make customer choice less complex, improve supply chain capability as well as ensuring a more streamlined production process.

Parts that are to be made obsolete with no existing stock will be replaced immediately with their equivalent. For parts where there is existing stock these will remain available for order until the stock has been consumed. Any part where there is no stock and zero demand will be obsolete with no replacement.

Please find attached a table of information detailing all parts affected, along with their corresponding stock count available for order. This information is correct at the time of this product change notice being published and is subject to change.

We appreciate your continued support. If you would like any further information, please do not hesitate to contact the undersigned or your local sales representative.

Yours sincerely,

Sam Mudge
Low & Medium Voltage Fuse Product Manager
Eaton's Bussmann Business – EMEA ICPD Division
Email: SamuelJMudge@Eaton.com
