

RelayGo

VALUE CHAIN

Our customer service is willing to help you with any inquiry in less than 24h, 365 days a year.

We designed flexible policies to fit your market needs, offering a unique and customize B2B relationship with our clients in all the steps of the customer journey.

You are our best source of innovation. If you could imagine a kind of electromechanical relay, then we can manufacture it, as we the only manufacture that is able to make any kind of relay with special coils and contacts, even we do offer custom label brand on our products. You design, we manufacture.

We believe that greatness is a choice and we have decided to be the fully owners of our productive processes 100% made in Spain. We are not only committing with the fundamental human rights, labour rights and environmental standards in our factory, but also in all the steps in our value chain.

We understand that a great service must also commit an excellent delivery time, our commitments is to serve any kind of relay and quantities in less that two weeks.

Our best promise is our product. We have the best and user friendly designed relay in the market to withstand 200.000 operations at full rated load and typical mechanical life of 100 millions operations. Our relays are carefully dimensioned tracking distances to improve isolation and have a high temperature tolerance over 130 °C. We only work with the best raw materials and suppliers in the market.
