

# We make what matters work\*

\* Horseless carriages. World War II aircraft. NASA space shuttles. Electric vehicles.

Over the past 100 years, Bussmann series products have protected the things that have propelled our world forward.

And they'll continue to protect for the next 100 years. Because we never lose sight of what matters. **And it's our job to make sure it works.**

**FuseFinder fuse and fuse block cross reference**

Eaton, the leader in circuit protection, power management and electrical safety offers an extensive selection of Bussmann series fuses and fuse blocks to meet your overcurrent protection needs.

If you need to find a replacement to another manufacturer's glass tube, low voltage branch and supplemental or high speed fuse, or fuse block or holder, use this quick cross reference FuseFinder to identify the Bussmann series replacement.

If you cannot find a product cross, more extensive listings are available online at [Eaton.com/bussmannseries/FuseFinder](http://Eaton.com/bussmannseries/FuseFinder). Or contact our Application Engineers by emailing [FuseTech@eaton.com](mailto:FuseTech@eaton.com).

\*\*\* Finger-safe covers are available for this block along with optional open fuse indication.

- Some competitor blocks are adder blocks and/or have multiple terminal offerings for Cu/Al or Cu only conductors.
- Wire ranges are not always the same. Please assure wire range is suitable for the application.
- All blocks listed have a box lug for wire termination. Alternate connection types are available in the 30 and 60 amp range. If an alternate type is required, please see the appropriate Bussmann series product data sheet for catalog number and ordering information.
